

## A supply and fueling network built around how you and your drivers work

The NFN Supply Network consists of company-owned and partner fueling locations, supply, storage, and logistics assets that provide fuel to customers where and when they need it. Our network has fueling locations even in hard-to-serve places, and our supply footprint covers all markets in the US. Our vast network offers diesel, dyed diesel, gasoline, marine fuel, jet fuel, DEF and lubricants you require. NFN is supported by an innovative end-to-end supply chain management system called Truefill that seamlessly integrates with most enterprise logistics software.

Whatever fueling option is required, from card-less backyard tanks to our dedicated commercial cardlock fueling network to our nationwide retail locations, we've got you covered.

If you have questions concerning how the NFN fleet card can positively impact your specific business needs, contact us at

1-877-204-0900 | [NFNcards@parklandusa.com](mailto:NFNcards@parklandusa.com)

And we are continuously adding more options to our already robust offerings.

To ensure your drivers can easily access basic amenities when routes take them further from home base, many of the retail locations within our network offer showers, restrooms, restaurants, and convenience stores. As well, our network offers your fleet managers and drivers 24/7 support.

## Hit the gas to improved efficiency

NFN easily allows your drivers to fuel up as efficiently as possible every time while keeping you completely in the loop. For more details on everything it offers, visit [NationalFuelNetwork.com](http://NationalFuelNetwork.com)

## Hit the road with better refueling options for your fleet

**NFN**<sup>™</sup>  
NATIONAL FUEL NETWORK

Your drivers need to access fuel quickly and efficiently no matter where the job takes them. And you need to be able to keep track of expenses and consumption patterns to protect your bottom line. At Parkland, we understand fueling your fleet is a significant expense, and the importance of easily managing fuel is critical. The National Fuel Network (NFN) has you and your drivers covered with a nationwide collection of commercial fueling options connected by a NFN fleet-card that ensures access to fuel and DEF wherever and whenever drivers need it.

## Incredible convenience tailored to your fueling needs

NFN offers better accessibility with easy-to-use fleet cards that makes filling-up quick and easy for drivers. NFN offers a range of fueling options tailored to fit your fleet's and driver's specific fueling requirements whenever, wherever.

**Commercial cardlocks** are conveniently located in commercial and industrial zones where fleets actively operate. Designed for large heavy-duty trucks, these locations reduce the risk of mishaps and expedite the refueling process,

getting drivers back on the road quickly and stress-free.

**Retail outlets** provide on-the-go refueling when drivers are away from cardlock options. With thousands of locations across the nation, a fueling outlet is never too far away.

**Backyard cardlocks** are located on-site at a customer's location and allow drivers to fuel up on the spot before heading out for the day.

## Gain better control of your business

To help control fuel expenses, NFN offers sophisticated fraud prevention

features as well as fleet card controls that limit drivers' purchases to reduce fuel slippage. Detailed fuel purchase reporting and analysis tools make it easy to monitor fuel spending and consumption patterns, and consolidated invoicing eases the administrative burden of managing fuel expenses.

## Enjoy cost savings by fueling at NFN locations

NFN offers a better price on fuel when using either NFN cardlocks or NFN retail stores. Typically, our customers can save 3-5 cents per gallon off regular retail fuel prices, resulting in substantial savings for your fleet. With easy access to NFN sites within your operating area, you can quickly realize significant savings by purchasing within our NFN site network.

For fleets who want the added convenience of fueling at their own private locations, NFN offers a range of readily available and cost effective fueling options that include direct-to-vehicle fueling and backyard tanks in a range of sizes to fit your fleet. All of these backyard fueling options can be combined with an NFN card to give you control and oversight of your drivers' usage patterns wherever they fuel up.

## Coverage that's everywhere your drivers are

Your drivers need to be able to access fuel no matter where their job takes them. We can service cardless and cardlock backyard tanks anywhere in the country and offer

**100+ Parkland-owned** retail fueling locations and **60+ cardlock** locations.

For fleets requiring national coverage or support across multiple regions, the **NFN CFN** partnership provides access to 2,500 dedicated cardlock locations and an additional 60,000 retail locations across the USA.

**The NFN Voyager®** partnership extends our network to include 225,000 retail fueling locations (constituting 95% of retail fueling stations in the US) — for those occasions when your drivers are away from their home operating area and need to fuel up.
